

03 February 2021

To whom it may concern,

I have been asked to share with you an advisory note on Unilever Ambient Food Products regarding consumption after the originally quoted expiry / best before date.

With relation to the product(s):

Product Code	Product Description	BBE Date	Batch Code
29796401	Colmans Tartare Sauce 2x2.25ltr	28/02/2021	L00380S652

A best before date advises the consumer on the quality of the product rather than the safety. Given the nature of these products in particular, we can confirm that, under normal storage and usage circumstances, as advised by ourselves, they should remain safe to consume for up to 3 months after the originally quoted on-pack best before date. However, we cannot guarantee that the product will retain its normal high quality standards (including taste) after the best before date has lapsed.

Prior to consumption, we recommend that you conduct a full sensorial evaluation of the products to determine suitability for use.

Any consumer / customer complaints received concerning this matter will be handled through our existing complaints processes.

Please note that we are unable to provide assistance with relabelling stock with amended best before dates.

If you have any questions, please feel free to contact me.

Yours sincerely

Lauren Lipp
Unilever Food Solutions Quality
