To whom it may concern,

With reference to the following product supplied by Seahawk Marine Foods Ltd.

- **Royal Greenland IQF Cooked & Peeled Coldwater Prawns, 1.8kg net, packed 5 x 2kg gross. Our product code: MSC/RG4442**

This product is coded with a Best Before End marked as 02/2021.

Assuming that the product is sealed in its primary packaging, free from damage and has been maintained at <-18°C throughout its life, there is no reason from a food safety perspective as to why the shelf life of this material cannot be extended for 6 months through until the end of 08/2021.

However you need to be aware that the product may deteriorate organoleptically (i.e. it could begin to lose flavour and aroma, and there is a slight possibility that colour and texture could be affected). We would suggest that you monitor the product organoleptically throughout the extended life, obviously Seahawk Marine Foods Ltd cannot accept responsibility for quality / organoleptic issues arising as a result of extending the product life.
